

MOUNTING BRACKET (80X30X20)

MOUNTING BRACKET (130X30X30)

**Description :**

The Apex AE4 Electro-Pneumatic Positioner provides accurate valve positioning for Spring return and Double Acting Actuators. The compact, lightweight Positioner also conforms to Namur VDI/VE 3845 mounting standards and features a low profile visual position indicator. Durable construction and corrosion resistant materials and coatings provide protection against the toughest applications in all process industries, including:

- 1) Chemical and Petrochemical
- 2) Power
- 3) Food and Beverage
- 4) Pharmaceutical
- 5) Municipal and Wastewater

**Features :**

Corrosion Resistant Materials. All exposed parts are either Stainless Steel or epoxy powder coated aluminium to permit use in corrosive environments. The gold-plated spool valve offers a high degree of protection against moisture laden and/or corrosive supply air. Captive Cover Screws permit calibration without potential for losing screws. Multiple Cam Options. The standard linear cam allows operation for 0-90°, 0-180°, split ranging, and for direct or reverse action applications. Optional characterised cams are available for a wide range of applications. Compact, Rugged Design has few moving parts, adding to its reliability and performance.
